

Resume Tailoring Flow

A short reference for the full product flow from first click to download.

Main flow

Dashboard

- Click "Create Tailored Resume"
- Check if base resume exists
 - No base resume
 - Upload old resume OR fill resume form
 - Save as Base Resume
 - Base resume exists
 - Continue
- Select Base Resume
- Enter Tailored Resume Name
- Paste Job Description
- Call API: /api/resume/tailor
- Backend reads Base Resume + JD
- AI returns analysis + changes
- Create Tailoring Session
- Redirect to /tailored-resumes/:sessionId
- Show score + matched keywords + missing keywords + diff UI
- User accepts/rejects changes
- Save updated changes in Tailoring Session
- Click Preview
- Open /tailored-resumes/:sessionId/preview
- Fetch Tailoring Session
- Convert changes to final Format3Data
- Render selected template
- Download PDF

Core data model

User

- Base Resumes[]
- Tailoring Sessions[]

Base Resume

- Master resume
- User-owned
- Used every time a new tailored resume is created

Tailoring Session

- id
- user_id
- base_resume_id

- name
- created_at
- updated_at
- analysis
- changes

What each thing means

Base Resume

- Standardized master resume data before AI

analysis

- score
- matched keywords
- missing keywords
- keyword coverage
- summary

changes

- post-AI review data
- old_value / new_value
- diff_mode
- status = pending | accepted | rejected
- used by tailored-resumes session page

Format3Data

- final preview/download shape
- not stored in tailoring session
- built on the fly from changes when user previews/downloads

Tailored resume page behavior

/tailored-resumes/:sessionId

- Opens saved tailoring session
- Shows analysis + diff UI
- User can continue later
- Previously accepted/rejected states are visible
- Every action updates changes in DB

Preview page behavior

/tailored-resumes/:sessionId/preview

- Fetch tailoring session
- Read changes
- Resolve final values
 - accepted = use new_value
 - rejected = use old_value

- pending = use fallback rule
- Build Format3Data
- Show template preview
- Download PDF

Keep in mind

Base Resume = source of truth before AI
Tailoring Session = AI result + review state
Format3Data = final render data for preview/download

Short memory version

Create Tailored Resume

- Add/select Base Resume
- Enter name + paste JD
- AI creates Tailoring Session
- /tailored-resumes/:sessionId resolves changes
- /tailored-resumes/:sessionId/preview builds final Format3Data
- Download PDF
